## PROJECTS

### Helping at Nixpkgs *(01/2024 - Present)*

Nix is a purely-functional package manager and NixOS a purely-functional linux distribution based on Nix.

### Contain *(11/2024 - Present)*

A helper for running disposable vms. I mainly use it for declarative dev vms.

### Nix Config *(06/2023 - Present)*

My highly modular NixOS configuration for all my machines and dev vms.

### Gradle Minify Plugin *(11/2020 - Present)*

Gradle plugin to minify CSS and JavaScript files written in Kotlin.

### Nushell LSP Lapce *(04/2024 - Present)*

Nushell language server integration for Lapce editor.

### Timpl Crate *(03/2023 - Present)*

Simple, yet powerful, template engine for Rust, based on proc macros.

## LANGUAGES

German (native)

English (C1)
